04

PHASE 1 : PROJECT RE-SET

Main Street Update

PHASE 2: DESIGN REVIEW STAGE

The findings:

- Revised pavement design by Geotechnical Engineering Consultant.
- Procedures for treatment of potential standard subgrade being developed.
 - Variety of methods to be proposed.
 - Subsoil drainage lines installed.

PHASE 3: CONSTRUCTION STAGE (MINOR)

**Construction to date
with minimal traffic disturbance**

- Handrail construction (outside the Royal Hotel).
- Removal of temporary water bollards and replace with traffic lane separators.
- Stormwater Drainage Works (outside Railway Hotel).
- Installation of sub soil drainage lines at western end (various locations)
- Installation of strata vault system (for landscaping at various locations at western end)
- Kerb and guttering (multiple locations).
- Driveway at Grenfell Motel.
- Trial pavement (centre island).

As at 13 December 2022

PHASE 3: CONSTRUCTION STAGE

After Christmas to January
2023

- Roundabout (turning circle only) construction noting temporary traffic measures will be in place (about 3 weeks).

Early 2023 to mid 2023

- Road works - Pavement will be installed in sections and be a rolling program creating minimal traffic disturbance.
- You can see and witness the pavement trials now in the centre island.

As at 13 December 2022
